EDUCATION

Borg El Arab Technological University (BATU) | Alexandria, Egypt | Graduated 2026

Faculty of Industry and Energy Technology, Information Technology Department

Bachelor's Degree in Information Technology, Software Specialization

- Graduation Project: NEXUS CITY, a smart-city showcase website (front-end developer in a 33-member team)
- Relevant coursework: Windows Programming, Machine Learning, Big Data & Analytics, Robotics

PROFESSIONAL SUMMARY

Information Technology graduate (Software specialization) with hands-on front-end experience in HTML5, CSS3, JavaScript (ES6+) and Bootstrap 5. Builds responsive, cross-browser interfaces, converts Figma/PSD designs into clean HTML/CSS, and integrates REST APIs to display live data. Projects are published on GitHub, including a team graduation project. Seeking a junior web developer or IT role in Alexandria.

TECHNICAL SKILLS

Front-End: HTML5, CSS3, JavaScript (ES6+), Bootstrap 5, Responsive Design, Figma/PSD to HTML/CSS

APIs & Data: REST APIs, Fetch, async/await, JSON, LocalStorage

Tools: Git, GitHub, GitHub Pages

Basic Knowledge: Python, FastAPI (exposure through graduation project), Canvas and CSS animations

Languages: Arabic (Native), English (Intermediate)

TRAINING

Web Designer Course (120 hours) | National Telecommunication Institute (NTI) | Jun 2026 – Aug 2026

Digital Egypt Youth Initiative, Creativa Innovation Hubs

- 90 hours of project-based training in HTML, CSS, Bootstrap and JavaScript, plus 30 hours of freelancing skills

PROJECTS

NEXUS CITY – Graduation Project (Front-End, team of 33)

- Built the showcase website for a smart-city project with a physical 6x5 m model: six subsystem sections (smart home, autonomous car, train, EV charging, parking, warehouse) with simulations, a single-page router and Canvas animations. HTML5, CSS3, JavaScript.

Demo: osamaalidev.github.io/NEXUS_CITY/ | Code: github.com/OsamaAliDev/NEXUS_CITY

GameReview – NTI Final Project

- Landing page to discover free-to-play PC games via the Free-to-Play Games Database API, with search, category browsing, a game-details modal, and dark/light theme. HTML5, CSS3, Bootstrap 5, JavaScript.

Code: github.com/OsamaAliDev/GameReview

GameReview2

- Arabic-interface games catalog using the FreeToGame API with genre and platform filters, a details modal, fallback data when the API fails, and sanitization of API data before rendering. JavaScript, Bootstrap.

Code: github.com/OsamaAliDev/GameReview2

FoodReview

- Recipe browser using the Forkify API with loading states, error and empty-result messages, and an automatic placeholder when an image fails to load. JavaScript, Bootstrap.

Code: github.com/OsamaAliDev/FoodReview

Weather (Synoptic)

- Weather dashboard that fetches live data from the OpenWeatherMap API, with city search and animated Canvas weather modes. HTML5, CSS3, JavaScript.

Code: github.com/OsamaAliDev/Weather

CRUD System

- Product management app (add, edit, delete, search) with field validation, image upload and data stored in LocalStorage. Bootstrap 5, JavaScript (ES6+).

Code: github.com/OsamaAliDev/crud-system
